SMART CITIES

THE EVOLUTION OF A DATA DRIVEN CONNECTED WORLD

IAN KHAN,
3X TEDX SPEAKER, TECH FUTURIST
AUTHOR AND FILMMAKER

"THE CITIES OF THE FUTURE WILL BE SUPERCONNECTED AND DATA DRIVEN. AS WE HEAD INTO AN ERA OF CONNECTED INFRASTRUCTURE WE MUST UNDERSTAND THE EMERGENCE OF SMART CITIES THAT ARE DRIVEN BY MACHINE LEARNING, DISTRIBUTED LEDGERS AND AUGUMENTED REALITY"

IAN KHAN

THE WORLD OF TOMORROW WILL BE SIGNIFICANTLY DIFFERENT

The cities of tomorrow will be driven primarily by infrastructure that is enabled by sensors, data that will transmit information across the infrastructure and an environment where everything from buildings to cars and power plants will be connected. This leads to interesting opportunities as efficiency, delivery, and overall value is redefined with new parameters. Smart Cities are a significant opportunity for organizations looking at adding tremendous value to the world around.

ABOUT IAN KHAN

The Future is driven by convergence. On one hand, it is the convergence of Artificial Intelligence, Blockchain & the Internet of Things and on a different plane it is the convergence of Trust, Automation, & Experiences. For Public & Private entities creating and delivering impact and value, the future is least likely to be about financial results, as automation and technology will ensure profitability. What will remain is impacting the lives of people, solving problems and anticipating obstacles before they arrive.

Futurist, Ian Khan delivers an impactful session on helping understand the colossal changes that the world of tomorrow will undergo and why unlocking human potential should be the first goal on any organizations agenda. Ian Khan's most popular session, "7 Axioms of Value Creation", helping organizations create a success path by understanding why Purpose, Execution and People are the driving force behind success.

Ian Khan is a CNN featured Technology Futurist, 3 times TEDx Speaker, Director of highly acclaimed documentary "Blockchain City", Bestselling author of "7 Axioms of Value Creation", and contributor to many publications including McGraw Hill and Forbes. He is also a founding member of the Government Experience (GX) initiative by the Prime Minister's Office, UAE.

One of the most widely quoted experts on Blockchain, Ian is on a mission to "Unlock Human Potential" by helping understand how technology can help us become more Efficient, Happy and more Human. Ian has spoken at industry conferences including Microsoft Worldwide Conference, World Government Summit, Money2020, SWIFT and helped hundreds of organizations with their digital transformation journey.
